

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

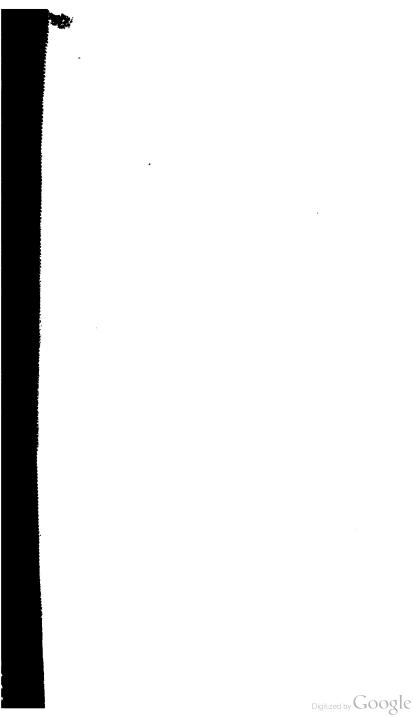

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

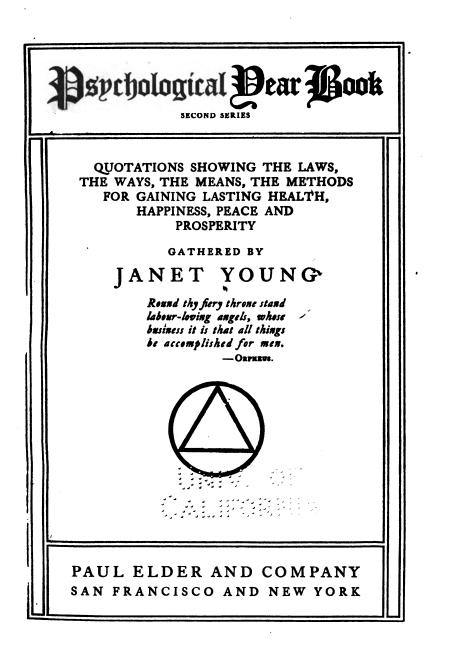

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. SYCHOLOGY is for all ages. Psychology is practical; it justifies religion, ennobles our faith in God. Those who believe and practice its teachings will certainly be profited.

The following quotations are gathered from thinkers of all times and are arranged with some reference to their chronology.

ee Psychological Pear Book 20

Your mind is your real self—your real being. There are more and more possibilities in nature, in the elements, in man and out of man; and they come as fast as man sees and knows how to use these forces, in nature and in himself. Possibilities and miracles mean the same thing.

- PRENTICE MULFORD.

e Psychological Year Book 20

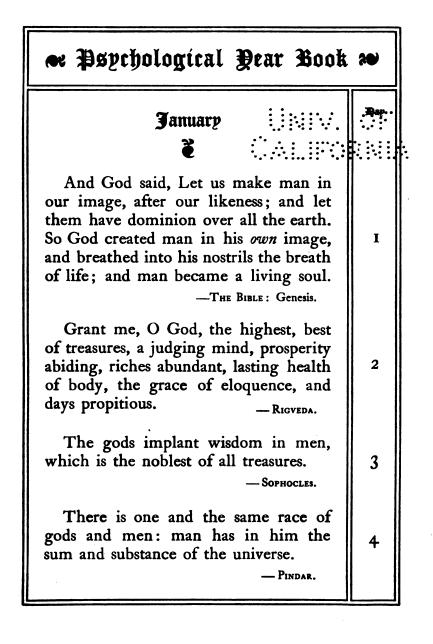

You and I are literal parts of this planet; this planet is alive, — all alive, a living, moving, growing, material expression of a gigantic spirit, even as your bodies are the visible expressions of your own invisible minds or spirits. A greater force than ever is coming to this planet—do not put any limit to your future possibilities.

- PRENTICE MULFORD.

æ Psychological Pear Book ֎

The constant union of the invisible with the visible. Prayer has occult activity and acts of itself,—it lifts itself outside of forms. You will be invested with power a secret between yourself and God. Once take this lute on which we sing to God in our hands, and we will never part with it. We feel God with us, in us. In His name we do the works He inspires. A miracle is performed. Silence and meditation are the means of following the way. Repose brings complete communion, the permanent union which invests you with power.
